## Introducing Orbit, the revolutionary new design in washroom cubicles and accessories from the UK's leading supplier.

Created and manufactured exclusively by Tollgate, the cutting-edge name in cubicle hardware and washroom furniture, Orbit transforms any environment into a stylish, sophisticated space.

The signature features in this unique design include a contrasting head rail and stylish elliptical pilaster, which can be lowered to floor level if required to maximise security and privacy for users.

Adjustable height support feet can be positioned into the base of the pilaster or secured to the centre of the partitions to create a floating visual appearance to the front of cubicles. Orbit can also incorporate a pilaster-mounted bolt system, and its heavy duty 'rise and fall' hinges, discreetly hidden behind the curved pilasters, can be adjusted to allow doors to fall open or closed.

Its minimalist design and sleek finish ensure Orbit is easy to clean whilst the tough, durable and hardwearing structure is ideal for frequent use in busy spaces. This versatile system can be easily adapted to suit your preferences, making it perfect for every kind of washroom location from restaurants and bars to exhibition centres, sports facilities, schools and cinemas.

Orbit is available to order in variety of finishes from standard anodised to powder coated, giving you even more choice to personalise the look and feel of your washroom environment.

This system can be used with any panel and door thickness and also allows glass doors to be used alongside other materials such as Solid grade Laminate.

Easy to install fittings

Partition mounted, adjustable pedestal feet create floating effect

Optional pilaster mounted bolt system.

DDA Compliant indicator bolt
