Wall Mount / Cantilever / Island Units / Single Bench / Locker Bench

www.tollgateproducts.co.uk

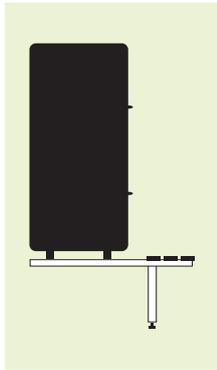

Tollgate bench brackets are manufactured from 40 x 40 x 2.0mm box section mild steel and finished in black or light grey as standard (other RAL colours are available but may be subject to surcharge).

The brackets are a welded construction and go through a zinc and yellow passivate plating process prior to powder coating. This process increases the corrosion protection, as it is applied to both inside and outside of each bracket, which also assists the adhesion of the finished powder coating.

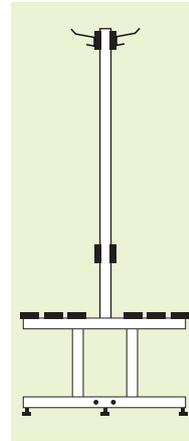

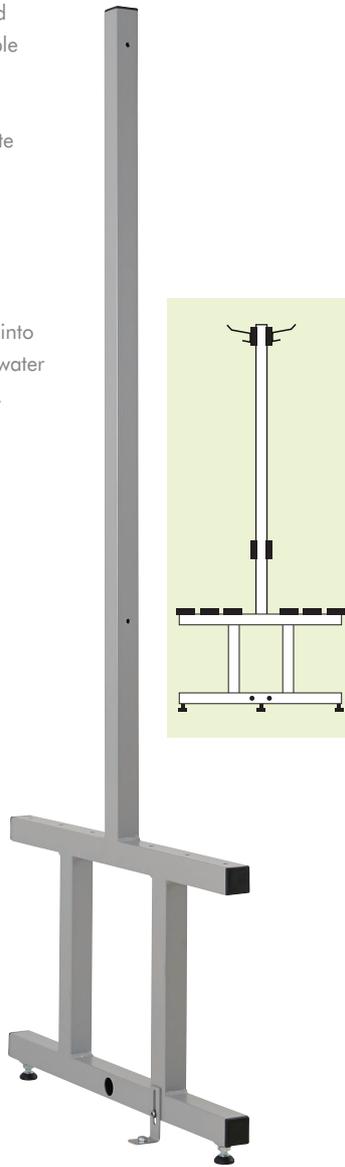

Powder coating is a non-toxic, odourless coating, which is suitable for use in high humidity and wet areas. It is important that the powder coat finish does not come into contact with strong cleaning chemicals. A relatively weak solution of warm soapy water is advised for cleaning, followed by a wipe-down with non-abrasive and dry cloth.

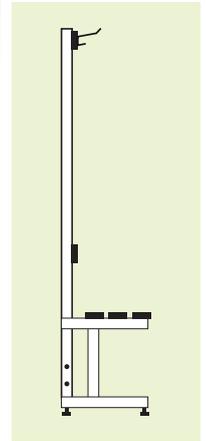

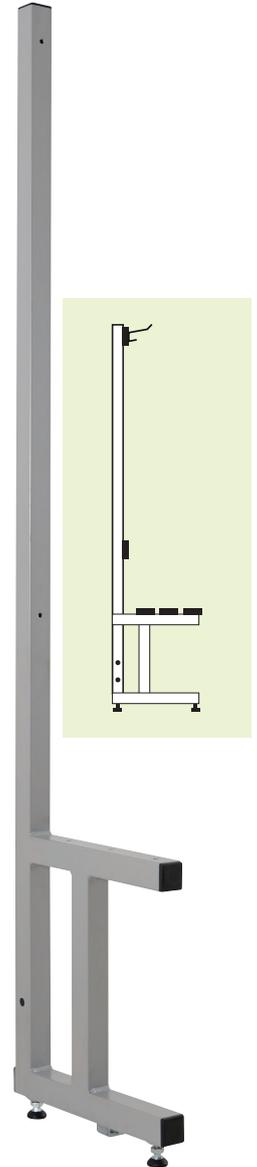

Adjustable feet and secure fixings
