

Top tips and questions to ask when specifying cubicle hardware

- What finish would you prefer?
 - What thickness are the doors you are fitting hardware to?
 - Also consider the...
 - Pilaster thickness
 - Division/partition thickness
 - Do you have flush or overlap cubicles?
 - Are they full or standard height?
 - What is the ground clearance of the partition/division?
 - you need to consider this when choosing support feet.
 - What level of security do you require? (i.e. anti-vandal fixings)
 - Is your door swing inward or outward opening?
-
